COOK  
GROUP

9th June, 2006

Mr Allan Rose  
Director, GW Engineers  
284 Victoria Avenue  
CHATSWOOD, NSW 2067

Dear Alan.

We write to thank you for your diligent and supportive consultancy over the many years which we have worked together. It has been very beneficial over these years that your level of service has remained consistent and that the relationship between our two practices has strengthened.

Of particular note is:

- o The ability of your office to work collaboratively with us to develop sensible and constructable solutions for our clients, providing a cost benefit in both scope and time.
- o Your office's special technical competence in many areas of structural design, especially in economic steel design and large span portals.
- o The reliance that over the years, that we can deal consistently with you and some of your staff which have been long term employees.
- o The benefit to our clients that you listen to their needs and can develop systems to satisfy those requirements.

We have appreciated our working relationship, and hope that this may continue for many years,

Yours faithfully

**David Cook**  
Director
